[INSERT NAME OF GOVERNMENT AUTHORITY]

Subject: Support for [INSERT NAME OF GOVERNMENT AUTHORITY] to Recognize Rights of Nature

Dear [INSERT TITLE OF RELEVANT POLITICIAN]

As a constituent of [INSERT LOCATION], I'm writing to you with an urgent request to **consider implementing a Rights of Nature resolution/ordinance/law** within [INSERT LOCATION]. Our community is increasingly impacted by the impacts of the climate crisis and broader environmental degradation which harms the people and biodiversity of [INSERT LOCATION]. [INSERT ENVIRONMENTAL CONCERN].

Implementing a Rights of Nature [INSERT NAME OF DOCUMENT] would legally recognize Nature's inherent rights, including rights to exist, persist, and regenerate its vital cycles. A Rights of Nature [INSERT NAME OF DOCUMENT] would recognize Nature as a rights holder and grant Nature legal standing, providing Nature a voice and legal representation in decision-making and in cases where Nature is harmed.

A template [INSERT NAME OF DOCUMENT] to recognize the Rights of Nature can be found [here](#).
Would you be willing to introduce Rights of Nature in the next [INSERT NAME OF MEETING]?

In passing this [INSERT NAME OF DOCUMENT], we have the opportunity to join the growing movement of communities across the world who are speaking up on behalf of the Rights of Nature, and by doing so, helping to prevent further harm to Nature while also seeking to restore the ecosystems that humanity is a part of. For example:

- Panama enacted Rights of Nature [through law](#) in 2022, recognizing Nature's rights to "exist, persist, and regenerate," joining the efforts of Colombia and Ecuador to effectively create a conservation corridor in one of the most megadiverse areas of the world.
- Ecuador established constitutional Rights of Nature in 2008, which led to the [landmark protection](#) of the Los Cedros Protected Forest against corporate mining interests—setting an important precedent that industry must uphold and protect the health of ecosystems.
- [New Zealand's court system](#) has granted the Whanganui River, as well as several other natural bodies, legal personhood—affirming the Indigenous Maori community's long-standing fight to establish their rights and combining traditional Indigenous knowledge with a modern legal system.

Over thirty-five countries have also embraced Rights of Nature at the national level, either constitutionally, through legislation, or through the courts; for example, [Mexico](#), [India](#), [Colombia](#), and the [United States](#) have all implemented Rights of Nature at various levels of local, regional, and national government, leading to landmark environmental cases preventing further harm to Nature and restoring critical ecosystems.

Implementing a Rights of Nature [INSERT NAME OF DOCUMENT] in [INSERT LOCATION] could have similar success in reorienting our legal systems towards a proactive approach to environmental protection and restoration.

Rights of Nature legislation provides an opportunity to address the root causes of the world's environmental crises – antiquated legal and economic mindsets which treat Nature as property subject to human exploitation. Implementing Rights of Nature in [INSERT LOCATION] would advance a more proactive approach to environmental protection which includes the interests of Nature into our legal system and which would better support Earth's life-support systems.

Establishing Rights of Nature would:

- (1) Provide Nature legal standing and a voice in local decision-making
- (2) Lead to a greater protection of human rights and the advancement of environmental justice
- (3) Restore a relationship of care and stewardship with Nature

A Rights of Nature [INSERT NAME OF DOCUMENT] in [INSERT LOCATION] **provides an opportunity to reorient current environmental law and practice to broadly address our environmental crises and national goals** (including the 30x30 conservation movement, solutions to the climate crisis, the advancement of human health and wellbeing, and [INSERT LOCAL ENVIRONMENTAL GOAL]).

Implementing a Rights of Nature [INSERT NAME OF DOCUMENT] is crucial to maintaining a safe and healthy environment for future generations of all life while aiding our solutions to the climate crisis and biodiversity loss. By prioritizing Nature's health, Rights of Nature will collectively protect human rights, including those of marginalized communities that experience disproportionate impacts of climate change and environmental pollution, by contributing to the protection of ecosystems that support all life.
